Type: ROUTINE INSPECTION
Date: 08-JUN-2022

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

There was 1 guinea pig observed with a health condition requiring treatment in accordance with the Program of Veterinary Care or consultation with the attending veterinarian. A brown and white adult guinea pig in Pen 22 had areas of hair loss with reddish skin over the rump area. The animal was in good body condition and did not appear lethargic. The licensee had not observed the condition, had not contacted the attending veterinarian, and was not administering any treatments. Abnormal skin conditions can cause distress or worsen if not addressed.

The licensee must contact the attending veterinarian to evaluate the animal and determine an appropriate plan of diagnosis and treatment.

Correct by: June 13, 2022

This inspection and exit interview were conducted with the licensee.
