Type: ROUTINE INSPECTION
Date: 05-SEP-2024

2.126(c)

Access and inspection of records and property; submission of itineraries.

At the time of the inspection, only three of the sixteen dogs listed on the APHIS 7005 Dogs on Hand Form were present at the facility. The staff representative said that the dogs are kept with other trainers and are not usually present at the inspection site. No itineraries have been submitted for the other 13 dogs not available for inspection.

Any person who is subject to the Animal Welfare regulations and who intends to exhibit any animal at any location other than the person's approved site (including, but not limited to, circuses, traveling educational exhibits, animal acts, and petting zoos), except for travel that does not extend overnight, shall submit a written itinerary to the Deputy Administrator. The itinerary shall be received by the Deputy Administrator no fewer than 2 days in advance of any travel and shall contain complete and accurate information concerning the whereabouts of any animal intended for exhibition at any location other than the person's approved site. If the exhibitor accepts an engagement for which travel will begin with less than 48 hours' notice, the exhibitor shall immediately contact the Deputy Administrator in writing with the required information. APHIS expects such situations to occur infrequently, and exhibitors who repeatedly provide less than 48 hours' notice will, after notice by APHIS, be subject to increased scrutiny under the Act.

3.13(a)(3)

Veterinary care for dogs.

At the time of the inspection, it was found that 15/16 dogs had not been vaccinated yearly for Bordatella as required by the attending veterinarian as written in the program of veterinary care. The last date of Bordatella vaccination was documented to be on 6-20-2023 for 14 dogs and on 4-19-2023 for one dog. Requirements for preventive care must be followed as directed by the AV.

Vaccinations for contagious and/or deadly diseases of dogs (including rabies, parvovirus and distemper) and sampling and treatment of parasites and other pests (including fleas, worms, coccidia, giardia, and heartworm) in accordance with a schedule approved by the attending veterinarian.

Inspection Report

3.13(b)

Veterinary care for dogs.

At the time of the inspection, medical record files were only available for 3 of the 16 dogs listed on the dogs on hand APHIS 7005 form.

Dealers, exhibitors, and research facilities must keep copies of medical records for dogs and make the records available for APHIS inspection.

These records must include: The identity of the animal, including identifying marks, tattoos, or tags on the animal and the animal's breed, sex, and age; Provided, however, that routine husbandry, such as vaccinations, preventive medical procedures, or treatments, performed on all animals in a group (or herd), may be kept on a single record; If a problem is identified (such as a disease, injury, or illness), the date and a description of the problem, examination findings, test results, plan for treatment and care, and treatment procedures performed, when appropriate; The names of all vaccines and treatments administered and the dates of administration; and the dates and findings/results of all screening, routine, or other required or recommended tests or examinations.
