

## Inspection Report

Real Pets Corp  
30 N 3rd St  
Womelsdorf, PA 19567

Customer ID: **24564**  
Certificate: **23-B-0200**  
Site: 004  
REAL PETS CORP

Type: ROUTINE INSPECTION  
Date: 04-FEB-2015

### 3.31(a)(1) REPEAT

#### SANITATION.

Section 3.31(a)(1) Cleaning and sanitation of primary enclosures: An enclosure with 10 weaned guinea pigs and an enclosure with 5 breeding guinea pigs and their offspring were excessively dirty. More fecal material was visible than bedding material. Animals standing in fecal material are potentially exposed to bacteria and parasites. The licensee must ensure that animal enclosures are sanitized at least once every two weeks and cleaned often enough to prevent an accumulation of excreta. Remains uncorrected.

### 3.31(b) REPEAT

#### SANITATION.

Section 3.31(b) Housekeeping: The cart, knives and potato slicer used to prepare potatoes for the animals were excessively dirty. The top of the rack for the hamsters had debris and many of the shelves on the racks for the dwarf hamsters were excessively dusty. There was spilled feed and bedding on the floor around the storage area. Rodent feces were along the walls and around the pallets of bedding and spilled feed, in the shipping/staging room, and washroom. Dirt and debris may harbor bacteria and fungus and cause animal health issues. Food preparation areas must be kept clean to prevent contamination of the food. Animal racks must be kept clean to keep the animals healthy. Spilled food, bedding and rodent feces must be cleaned up to help prevent and monitor pests. Premises must be kept clean. Remains uncorrected.

### 3.31(c)

#### SANITATION.

Section 3.31(c) Pest control: Rodent droppings were observed along the walls and by the spilled feed and bedding. Rodents may spread contamination and disease between animals in separate enclosures. Wild rodents may introduce diseases and parasites into the animal colonies. An effective program for the control of mammalian pests must be established and maintained. Correct by February 11, 2015.

An exit briefing was conducted with the facility president.
