Wildlife Adventures Inc  
Po Box 542  
Jarrettsville, MD 21084

Customer ID: 19796

Certificate: 51-C-0110

Site: 001

WILDLIFE ADVENTURES INC

Type: ROUTINE INSPECTION

Date: 21-MAR-2016

### 3.127(d)

#### FACILITIES, OUTDOOR.

The new Patagonian cavy area has two gates on the perimeter fence which are only four feet in height. The perimeter fence including access gates must be at least 6 feet in height so that it protects the animals in the facility by restricting animals and unauthorized persons from entering, and so that it can function as a secondary containment system for the animals in the facility. The gates must be replaced or repaired so that they are at least 6 feet in height. Correct by April 18, 2016.

### 3.131(a)

#### SANITATION.

An enclosure housing two chinchillas has accumulations of excreta on three elevated plastic shelves. Excreta must be removed as often as necessary to prevent contamination of the animals and to minimize disease risks and odors.

Ineffective cleaning and/or infrequent cleaning exposes the animals to disease hazards and health problems. Correct by ensuring all primary enclosures are cleaned and sanitized often enough to prevent an accumulation of excreta and debris. Correct by March 22, 2016.

An exit briefing was conducted with the president of the facility.

Prepared By: ROBERT MARKMANN, A C I USDA, APHIS, Animal Care
