Type: ROUTINE INSPECTION
Date: 15-NOV-2019

No non-compliant items identified during this inspection.

Photos were provided by the facility showing the improved condition of the feral boar.

The attending veterinarian submitted the following information: He performed a physical exam with the following observations: Health-wise: physically looks normal now for a pig his age. The skin infection has healed and his weight is now within normal limits. Temperament-wise; improving allowing interaction in his enclosure. The enclosure is of adequate size with a tin roof hut in one corner, a muddy open ground area in another corner and the rest is stone/concrete.
