

## Inspection Report

---

LYNNWOOD PARK ZOO  
1071 WELLS RD  
JACKSONVILLE, NC 28546

Customer ID: **1927**  
Certificate: **55-C-0001**  
Site: 001  
LYNNWOOD PARK ZOO

Type: ROUTINE INSPECTION  
Date: 26-JUL-2023

---

### 3.125(a)

#### Facilities, general.

The enclosure housing two African Crested Porcupines has sharp wires protruding into the enclosure where the ACPs have been engaging in their normal digging activity. The exposed sharp wires pose a paw entrapment risk or a puncture injury risk to the ACPs. The regulations state that the facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals. Corrected during inspection.

### 3.130

#### Watering.

The waterers for the two groups of degu contained excessive amounts of green algae. Not providing clean, potable water can result in dehydration or illness risk due to reduced water consumption or from drinking potentially contaminated water. The regulations state that all water receptacles shall be kept clean and sanitary. Corrected during inspection.

This inspection and exit interview were conducted with the facility representative.
