

## Inspection Report

Kord Mc Guire  
385 Quinn Road  
West Alexandria, OH 45381

Customer ID: **2206**  
Certificate: **31-C-0031**  
Site: 001  
KORD MC GUIRE

Type: ROUTINE INSPECTION  
Date: 10-MAR-2015

---

### 3.80(a)(2)(1) REPEAT

#### PRIMARY ENCLOSURES.

The adult male Olive baboon enclosure has several sharp points from a section of wire mesh. There is also a loose wire in the entranceway between two sections of the enclosure. The ends of the wire fencing around the cut-out section has numerous loose wire ends, some pointing inside the enclosure. No lacerations were observed on the animal. Surfaces in the housing facilities of non-human primates must be free of jagged edges and sharp points that may injure the animal. Sharp wire ends can cause lacerations to the skin and be broken off and ingested. Correct by ensuring that these sharp edges are removed or made inaccessible to any animals. The licensee removed the loose wires in the enclosure at the time of the exit briefing.

### 3.125(a) REPEAT

#### FACILITIES, GENERAL.

\*\*The enclosure with two goats had several wires that had broken off the enclosure fence at one end and were sticking inside the enclosure. No lacerations were observed on any of the goats. Sharp points or jagged edges could cause injury and pain to an animal. Loose wires are also more likely to break off and be eaten or stepped on. Correct by ensuring all housing facilities are free of sharp points that could injury animals. Furthermore, monitor all wire fences and enclosures to ensure loose wires are removed and could not harm any animals.

REMAINS UNCORRECTED

The eight large feline carnivores cited on the previous inspections reports were moved to another facility.

The inspection and exit briefing were conducted with the licensee.
