Certificate: 72-B-0030

Site: 001

TULANE NATIONAL PRIMATE RESEARCH CENTER

Type: ROUTINE INSPECTION

Date: 20-OCT-2015

2.38(f)(1)

MISCELLANEOUS.

In early November 2014, three macaques in the breeding colony were affected by a previous biosecurity breach, in which one or more staff members had failed to adhere to established biosafety and infection control procedures. This biosecurity breach led to the euthanasia of these animals. Handling of all animals should be done as expeditiously and carefully as possible in a manner that does not cause trauma, behavioral stress, physical harm or unnecessary discomfort. The IACUC acted by making the necessary changes in the SOPs, retraining staff and implementing additional measures to prevent any further incidents.

Correct by: This incident has been addressed by the facility's IACUC and has been corrected.

The records review took place October 20, 2015 with APHIS personnel Dr. Simone Tomlinson, VMO, Dr. Tami Howard, SACS and Dr. Elizabeth Meek, Assistant Regional Director. The exit interview took place with APHIS personnel and the Associate Director of Veterinary Resources and Executive Director of Comparative Medicine.

Additional Inspectors

Theodorson Elizabeth, Director

Howard Tami, Supervisory Animal Care Specialist

Prepared By: SIMONE TOMLINSON, D V M USDA, APHIS, Animal Care

Date:
