LINDA THOMPSON

Type: ROUTINE INSPECTION
Date: 17-JUL-2014

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

In the indoor housing facility there are three bottles of drugs on top of a sink along the back of the building. One bottle that has a needle and syringe sticking out of it does not have a label. Licensee stated the bottle contained a mixture of ivermectin and alcohol. Medications must be labeled with appropriate and accurate information in order to ensure that the contents of the container can be known with certainty, that the drugs are used at safe doses and medications are not used past their expiration dates. As part of the adequate program of veterinary care, the licensee must consult with the attending veterinarian and ensure that all medications at the facility are labeled with the medications, the dosage instructions and expiration dates. The licensee must also ensure the veterinarian has approved the use of any medications that have not been approved for use in dogs to ensure the proper dosing and administration is accomplished. This must be added to the program of veterinary care at the facility.

To be corrected by: July 24, 2014

3.1(b)

HOUSING FACILITIES, GENERAL.

Condition and site.

Inside of the indoor facility there is a clutter of medication bottles, spray paint, pest control chemicals and other various items stored on and near the sink on the back wall of the building. Animal areas inside of housing facilities must be kept neat and free of clutter, including equipment and stored material. This is to ensure the safety, health and well-being of all dogs. The area may contain materials actually used and necessary for cleaning the area, and fixtures or equipment necessary for proper husbandry practices. Licensee must clean the area mentioned and store the items in an appropriate location.

To be corrected by: July 19, 2014

An exit briefing was conducted with the facility representative at the time of inspection.
