HERSHBERGER FARM LTD

Type: ROUTINE INSPECTION

Date: 13-JUL-2017

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Two goats in the pasture across the road each have an ~3cm wide fluid-filled swelling on the right side of the jaw. These types of swellings can be infectious and need to be treated as such to avoid disease spread. These animals must be treated according to the veterinarian's instructions.

The facility has been sprinkling fly bait in areas where the animals have access, and at least one animal had evidence that it had been sniffing and/or eating the bait. The label on the bait states that this is hazardous to domestic animals and must not be applied in areas where the animals have access.

Correct by 7/20/17.

This inspection and exit interview were conducted with the facility representative.

Additional Inspectors

Coleman Randall, Animal Care Inspector
