Alexandria, VA 22305

Customer ID: **333156**
Certificate: **52-T-0125**
Site: JFK
ETHIOPIAN AIRLINES

Type: ROUTINE INSPECTION
Date: 28-MAR-2024

3.15(a)(2)

Primary enclosures used to transport live dogs and cats.

On March 16th, 2024, 2 dogs arrived at John F. Kennedy International Airport (Queens, New York) from Bole Addis Ababa International Airport (Addis Ababa, Ethiopia) on Ethiopian Airlines (AWB# 071-5165-9285).

The primary enclosure for the two dogs contained loose pieces of sharp wire which were pointed inwards. Sharp points or edges within an enclosure can injure dogs. Carriers must ensure that primary enclosures used for transport have no sharp points, edges, or protrusions that could injure the animals.

3.15(c)(2)

Primary enclosures used to transport live dogs and cats.

On March 16th, 2024, 2 dogs arrived at John F. Kennedy International Airport (Queens, New York) from Bole Addis Ababa International Airport (Addis Ababa, Ethiopia) on Ethiopian Airlines (AWB# 071-5165-9285).

The primary enclosure for the two dogs did not have appropriate projecting rims on any side. Projecting rims are necessary to provide adequate ventilation for the animals in transport. Projecting rims or similar devices must be large enough to provide a minimum air circulation space of 0.75 inches between the primary enclosure and anything the enclosure is placed against.

This inspection was conducted with cargo facility representatives. The exit interview was conducted by phone with an airline representative.
