#### Facilities, general.

On Dec 16, 2022, a female Bongo was able to push through a section of her enclosure fence. She then escaped from the facility through a washed- out section of the perimeter fence. She was safely recaptured and returned to the facility within 30 minutes without injury.

The facility failed to maintain the primary enclosure fence and the perimeter fence in good repair to contain the animal.

This could have resulted in injury or death to the Bongo. The facility needs to ensure fences are structurally sound and maintained in good repair to protect animals from injury and to contain the animals.

All fences were repaired prior to this inspection.

This inspection and exit interview were conducted with facility representatives.
