Type: ROUTINE INSPECTION
Date: 02-JUL-2014

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

* The written program of veterinary care had incomplete information under Section III: No animals were listed along with diseases for which vaccines are performed. (Or N/A if not applicable) The licensee, in coordination with the attending veterinarian, must provide more specific information on the type of products used at the facility and the frequency of use. Ivermectin is listed as a parasite control in the Blood and Intestinal parasite program. There is no dosage or how the Ivermectin is administered. This is not considered to be adequate veterinary care. The licensee must ensure that the program of veterinary care is updated with current preventive practices to ensure that all animals are provided adequate veterinary care. The breeder must insure that the Program of Veterinarian Care is completely filled out. USDA regulations require that the program of vet care must be completely filled out. Correct by 08-02-2014

This inspection and exit briefing were conducted with the owner.
