Contingency planning.

The Contingency plan available for review at the time of inspection was inadequate. The Licensee has a method of documenting a contingency planning program using APHIS Form 7093. However, sections of the form were incomplete, including the situations that trigger implementation of the plan, the specific tasks/responsible person(s) for the tasks, and the specific resources needed to perform the task.

Per this section, exhibitors must develop, document, and follow an appropriate plan for the humane handling, treatment, transportation, housing, and care of their animals in the event of an emergency or disaster (one which could reasonably be anticipated and expected to be detrimental to the health and well-being of the animals in their possession. The facility shall ensure an adequate contingency plan is developed and followed in case of an emergency.

Correct by January 12, 2024.

This inspection and exit interview were conducted with the facility representative.
