Certificate: **58-C-0992**

Site: 001

GULF WORLD MARINE PARK
INC

Type: RE-LICENSE INSPECTION

Date: 09-SEP-2022

3.106(a)

Repeat

Water quality.

There were several dates during the months of March, April and May 2022 where the total chlorine readings in the pools Dolphin East, Dolphin West, Dolphin Far West and Dolphin Main were above 1PPM. Industry standards set the maximum level of total chlorine at 1.0PPM. Total chlorine is a measurement of both free chlorine and chloramines. Chloramines are much more irritating to an animal's skin, eyes and lungs than free chlorine. Total chlorine levels above 1.0PPM over long periods of time can cause marine mammals skin, respiratory, and eye issues. Constant management and maintaining chlorine levels below 1.0 PPM is necessary to maintain the health and welfare of the marine mammals.

3.106(b)(3)

Repeat

Water quality.

There were at least two coliform readings for the pools (Dolphin East, Dolphin West, Dolphin Far West and Dolphin Main) that were not taken at the required 7 day intervals. Timely and accurate testing for coliform counts is required to quickly identify harmful levels of bacterial counts and effectively maintain water quality standards. Water samples shall be taken and tested at least weekly for coliform count.

This is a 1st Re-License Inspection for a Class C license. The inspection and exit briefing were conducted with the applicant.
