MIRIAM HOOVER  
11952 County Hwy H  
STANLEY, WI 54768

Customer ID: **501666**

Certificate:

Site: 002

MIRIAM HOOVER

Type: FOCUSED INSPECTION

Date: 06-NOV-2023

---

### 2.40(b)(2)

#### Repeat

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

Several expired medications (cephalexin Exp 1/20, nemex Exp 9/22, chlorconazole ear flush Exp 9/22, trizedta ear flush Exp 1/20, triple wormer Exp 7/22, derma-vet ointment Exp unreadable and two bottles of liquid melatonin Exp 6/20 and 6/21) were in storage. The licensee is unsure if any of the medications had been used since the expiration dates. Having expired medications in storage increases the likelihood that they will be used on the animals. The use of expired medications might not have the intended effect on the animals or could make them sick. Ensure expired medications are not stored and used on the animals.

### 2.50(a)(2)

#### Time and method of identification.

Six weaned puppies all under sixteen weeks of age do not have identification numbers listed on their cage card. Lack of identification does not allow for the proper tracking of the puppies. All puppies must be identified with official USDA identification. Correct by November 10, 2023.

This inspection and exit interview were conducted with the licensee.
