Customer ID: 42232

Certificate: 43-A-5373

Site: 001

DAVID SWARTZENTRUBER, CORA SWARTZENTRUBER

Type: ROUTINE INSPECTION

Date: 24-NOV-2015

### 3.4(b)(3)

#### OUTDOOR HOUSING FACILITIES.

Sec. 3.4 Outdoor housing facilities. (b) Shelter from the elements. (3)

\*\*\*\* Two dogloo type dog houses, affecting 4 dogs, tunnels have been chewed back. The amount of damage done to the tunnel allows the rain, snow, and or wind to impact the dogs while inside and hinder their ability to stay warm. Dog houses must be maintained to protect the dogs from wind, rain, snow and allow the dog to stay warm when inclement weather is in the forecast.

To be corrected by 11-30-2015

### 3.9(b)

#### FEEDING.

Sec. 3.9 Feeding. (b)

\*\*\*\* Two of the metal self feeders, affecting 4 dogs, are rusted out at the bottom creating a hole and allowing the feed to be contaminated. The food being exposed allows contamination from water, urine, rodents, caking, molding and deterioration. Once the food is contaminated its nutritional value, palatability, and wholesome is compromised. Feeders must be maintained to ensure the food is protected from molding, deterioration and caking.

To be corrected by 11-30-2015

Inspection and Exit interview conducted with facility representative.
