Type: ROUTINE INSPECTION
Date: 01-APR-2015

2.38(b)(1)(2)

MISCELLANEOUS.

A list of animals on-hand was not available for review at time of inspection. The required paperwork should be made to APHIS officials at time of inspection.

To be corrected from this day forward

3.127(a)

FACILITIES, OUTDOOR.

There is not sufficient shade provided for the 4 camels housed together. Although there is some natural shade provided by a tree, it is not enough to comfortably protect all the animals. A system should be in place to ensure animal enclosures have sufficient shade by natural or artificial means to protect animals when sunlight is likely to cause overheating or discomfort to them.

To be corrected by June 1, 2015

3.127(d)

FACILITIES, OUTDOOR.

A portion of the perimeter fence, which serves as the entry way into the facility, does not have a gate that can be closed. As a result, entry into the animal compound is open and its function as a secondary containment is reduced.

There are at least two areas along the perimeter fence that are less than 6 feet high and does not meet our minimum height requirement for the perimeter fence.

All outdoor housing facilities must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. Fences less than 6 feet high must be approved in writing by the Administrator. The fence must be constructed so that it protects the animals in the facility by restricting unauthorized persons or animals from having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

To be corrected by October 1, 2015
