

## Inspection Report

---

All Pets Club Inc  
1167 North Colony Rd  
Wallingford  
New Haven, CT 06473

Customer ID: **28025**  
Certificate: **16-B-0040**  
Site: 001  
All Pets Club Inc

Type: ROUTINE INSPECTION  
Date: 19-AUG-2025

---

### 3.6(a)(2)(ix)

#### Primary enclosures.

At the time of the inspection, there were multiple areas in the enclosures housing dogs where the surface layer of paint has chipped and peeled away, exposing the materials underneath. Rough, uneven surfaces cannot be readily cleaned and sanitized and may therefore harbor pathogens that can cause disease in these animals. The facility must ensure that all surfaces in contact with the dogs can be cleaned and sanitized or be replaceable when worn or soiled. To be corrected by November 11, 2025.

### 3.13(b)(3)

#### Veterinary care for dogs.

There are several dogs currently on nebulization treatments for respiratory symptoms, as directed by the attending veterinarian. These treatments are to be administered three times per day according to the attending veterinarian's instructions. According to the licensee, these treatments are being administered as directed. However, some of the nebulization treatments were not documented as being given in three of the dogs' medical records. Incomplete medical records prevent APHIS officials from verifying that treatments are being administered exactly as directed by the attending veterinarian. The facility must ensure that medical records for dogs are complete, including identification, any problems identified, treatment plans, the names and dates of treatments administered, and other relevant findings. To be corrected by September 2, 2025.

### 3.153(a)(1)(ix)

#### Primary enclosures.

The material coating the walls in enclosures housing parakeets, sun conures, and lovebirds has peeled away in several areas, exposing the uneven, rusted surface beneath. Rusted and uneven surfaces cannot be readily cleaned and sanitized, potentially exposing these animals to pathogens that can cause disease. The facility must ensure that all surfaces in contact with the birds can be readily cleaned and sanitized or replaced when worn or soiled. To be corrected by November 11, 2025.

This inspection and exit interview were conducted with a facility representative.
