Type: ROUTINE INSPECTION
Date: 06-JUL-2015

3.6(a)(2)(10)

PRIMARY ENCLOSURES.

In many of the outdoor enclosures there are exposed metal grates along the edges of the fence. The grates are present to prevent dogs from digging out. However, these grates are exposed along the edges and multiple "dig-holes" are present against the fence where dogs have dug. The numerous "dig-holes" and the exposed 6 inch metal grate holes create possible limb injury threats to the enclosed animal. Applicant needs to remove the grating or replace dirt in the "dig-holes" and on top of the metal grate to ensure the animals are safely contained and protected from potential injury.

To be corrected by 14 July 2015.

Inspection and exit interview conducted with facility representative.
