

Inspection Report

Southwick Wild Animal Farm Inc
2 Southwick St
Mendon, MA 01756

Customer ID: **1985**

Certificate: **14-C-0021**

Site: 001

Southwick Wild Animal Farm Inc

Type: ROUTINE INSPECTION

Date: 20-SEP-2023

3.125(c)

Facilities, general.

The refrigerator used for day storage of the diet in the big cat area had black sticky material in the seal of the door, and red liquid and food debris on the floor of the refrigerator. Additional refrigerators in the chimp and education buildings also had a black and brown material in the door seals, and the feed containers in the education building had brown sticky material built up on the handles and clamps keeping lids on. Debris and food waste in or on the food storage units and refrigerators may contaminate food or prevent units from properly functioning to maintain wholesomeness of the diet. The facility must ensure that food supplies are protected from contamination.

Correct by 25 September 2023.

3.33(b)

Classification and separation.

4 guinea pigs were housed with 2 rabbits in the same primary enclosure at the time of inspection. Housing guinea pigs with other species may present a risk of disease or interspecies aggression. The facility must ensure that guinea pigs are not housed in the same primary enclosure as other species.

Correct by 21 September 2023.

3.153(a)(1)(ii)

Primary enclosures.

The enclosure containing two kookaburras had a plugged in heat lamp and cord that was accessible by the birds. Injury from animal contact with hot bulbs or fixtures or the electrical cords and outlet is possible. The facility must ensure that the primary enclosure protects the birds from injury.

Correct by end of day 21 September 2023.

This inspection and exit interview were conducted with the facility representatives.
