Type: ROUTINE INSPECTION
Date: 08-NOV-2014

2.40(b)(3) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

*** Four puppies id # 3814, 3914, 4014, 4114 are separated from their mother due to small sores and scabbing on their bellies. The license's thought the sores came from bacteria in the mother's mouth as she carried them around, but even separated the puppies still developed them. The licensee's have spoken to other breeders and are attempting to treat the sores, but have not spoken to the vet about the situation. Daily observation of the animals includes communication with the attending veterinarian on problems of animal health in a timely manner so that these items can be treated accordingly. This needs to be addressed and these puppies seen by the vet for their health.

Correct by: Nov 12, 2014

3.11(b)(2)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

*** Several of the feeders have a layer of grime along the sides and need to be cleaned. Feeders need to be sanitized on a routine basis to keep this grime from accumulating and for the health of the dogs.

*** There is a layer of dust throughout the kennel that needs to be cleaned more frequently. Per this regulation, used primary enclosures must be sanitized at least once every 2 weeks and more often if necessary to prevent an accumulation of dirt and debris.

Correct by: Nov 17, 2014

An exit briefing was conducted with the licensee at the time of the inspection.
