Date: 26-FEB-2025

3.127(d)

Facilities, outdoor.

Multiple large sections of perimeter fence are fully missing. These missing sections are larger than the arm span of the inspector. An incomplete perimeter fence could allow unauthorized people and animals to access the zoo animals and cause harm. Also, if an animal escaped its primary enclosure, it could leave the zoo and be injured or pose danger to the general public. The facility must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out and to function as a secondary containment system for the animals in the facility.

Correct by April 28, 2025

This inspection and exit interview were conducted with a facility representative.
