

Inspection Report

City Of Folsom
403 Stafford Street
Folsom, CA 95630

Customer ID: 3381
Certificate: 93-C-0784
Site: 001
CITY OF FOLSOM

Type: ROUTINE INSPECTION
Date: 17-FEB-2015

2.50(c)(2)(1)

TIME AND METHOD OF IDENTIFICATION.

Five dogs, two guard dog and three wolf hybrids did not have sequential numbers on their tags. The dog Annabel did not have a tag (it did not have a sequential number) on her. Two domestic cats do not have sequential numbers on their tags.

Official identification is required in order to facilitate the required record keeping and to ensure that each animal's identity can be known for certain. A system to ensure that all dogs are properly identified needs to be created.

To be corrected by: 4/9/2015

2.75(a)(1)(6)

RECORDS: DEALERS AND EXHIBITORS.

Two guard dogs and three wolf hybrids do not have a sequential number on the tag that can be linked to the acquisition records. Two domestic cats do not have a sequential number on the tag that can be linked to the acquisition records. Complete and accurate records must be kept in order to ensure that each animal's identity can be known with certainty and to facilitate tracking or tracing of animals.

The licensee must ensure that all required records are filled in with complete and accurate information.

To be corrected by 4/9/2015

3.11(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Two wolf hybrids have night quarters consisting of a concrete slab surrounded by chain link sides. Surrounding the chain link sides, there is a sheet metal building. Adjacent to the dog s night quarters, hair and debris is being hosed off the concrete slab and ends up on the ground. Not all the material is being removed from the area and

Inspection Report

being properly disposed of.

This area needs to be cleaned more often to prevent possible bacterial, algae, or mold build up. This debris could potentially create a health risk to the animals and the keepers. The system to ensure that the debris is removed in a timely manner is not working. The facility needs to intensify the cleaning routine to remove the potential health hazards.

To be corrected by 4/9/2015

3.131(c)

SANITATION.

The black bears have several den areas that are not being adequately cleaned. The Tahoe Quarantine door area (this is a door and window that is about 2 x 2 feet. It links the kitchen to the den. This is used at times to be able to observe this den s animal and to feed the animal) has an accumulation of cobwebs and straw. The dust accumulation on the cobwebs indicates that this area has not been cleaned for an extended period of time. There is currently one bear in this den. The middle exhibit den, with two bears, has numerous cobwebs with extensive dust on them. The dust on some of the cobwebs is thick enough to make the areas appear to be opaque.

The general cleaning system to keep the areas free of the buildup of excess cobwebs is not adequate. This system is to be reviewed to ensure that all the areas are adequately cleaned. If these areas are not be being cleaned enough, it indicates that there may be other cleaning issues which could affect the health of the animals.

To be corrected by 4/9/2015

An exit briefing was conducted with the facility representative
