COLLEGE

Type: ROUTINE INSPECTION

Date: 09-MAY-2022

3.125(a) Critical

Facilities, general.

On the evening of October 13, 2021, 3 dwarf goats were predated and killed by a bear within their outdoor enclosure.

Colorado Parks and Wildlife confirmed that it was a bear and trapping attempts were made but unsuccessful. Following the incident, the facility began keeping the animals inside the barn until welded wire sliding doors could be constructed for the shelters in the outdoor pens. The goats and sheep at the facility are currently being housed in outdoor enclosures that are surrounded by a 4-foot-high wood and wire fence and placed inside the updated shelters at night. No other deterrents are being used at this time.

Failure to provide an enclosure that protects the animals from predation can lead to injury or death of the animals. The outdoor housing facilities for the goats and other livestock must be structurally sound and constructed in a way that protects the animals within from injury. A corrective plan with a reasonable timeline for completion must be developed and initiated.

To be corrected by June 13th, 2022.

This inspection and exit interview were conducted with a facility representative.
