KOWIACHOBEE ANIMAL PRESERVE INC

Type: ROUTINE INSPECTION

Date: 13-JUN-2017

2.131(c)(1) REPEAT

HANDLING OF ANIMALS.

During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public with barriers between the animal and the general viewing public so as to assure the safety of animals and the public.

The barrier in front of the newer adult tiger enclosure at the rear of the facility is not sufficient to assure there is minimal risk of harm and safety to the public. There is a barrier approximately 4' in height in front of the enclosure, however both sides are open ended where the public could enter and have contact with the tiger and become injured. To assure there is minimal risk of harm and safety to the public the barrier must assure the public cannot have access to the enclosure.

The licensee stated there are guided tours at this facility, however members of the public especially larger groups of children could go around the open ended barrier having contact with a potential dangerous animal. A similar noncompliance was cited during the May 23, 2016 inspection with the cougar.

TO BE CORRECTED BY: IMMEDIATELY

3.127(d)

FACILITIES, OUTDOOR.

There are large sections of the perimeter fence on the left hand side entering the facility that have no perimeter fencing. During the last inspection on January 17, 2017, there were sections of perimeter fencing in the same area that were in need of repairing or replacing that was discussed with this licensee.

TO BE CORRECTED BY: JULY 16,2017.

This inspection and exit interview were conducted with licensee.
