Site: 001

The Watering Hole at Monsoon  
Lagoon

Type: ROUTINE INSPECTION

Date: 12-SEP-2023

---

### 3.154

#### Environment enhancement to promote psychological well-being.

The facility has not developed an environmental enhancement plan for avians. A plan to promote the psychological well-being of avian species must be developed, documented, approved by the Attending Veterinarian, and made available for APHIS officials upon request. Avian species can be highly intelligent and social and may require special requirements in their care and management to avoid symptoms of psychological distress. An environmental enhancement plan is aimed toward avoiding this common problem of the species. To correct, the facility must create and implement a plan to address social needs, environmental enrichment, and individualized care for birds with special considerations (such as juveniles or individuals with signs of psychological distress). Correct by: September 26, 2023.

This inspection and exit interview were conducted with the licensee.
