EUGENE BURKHOLDER

Type: ROUTINE INSPECTION

Date: 11-MAR-2014

No non-compliant items identified during this inspection.

This is a focused inspection from the NCI during the last inspection.

The attending veterinarian was contacted and the sows #1001 and #1624 were treated for their abscesses, which have healed very well. The young pigs with the scrapes on the sides of their noses and cheeks were treated and have been relocated to another barn, and the current population of young pigs looks healthy and well cared for.

Currently the staff are keeping better track of the young pigs and treating them immediately when they start showing signs of the facial injuries, and the sows abscesses are being treated when they are observed. The staff are more vigilant in their observations of abscesses and sores on their swine population and have worked out treatment regimens' with their attending veterinarian.

Inspection and Exit interview conducted with facility representative.
