Date: 04-AUG-2015

2.40(b)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The kennel facility consists of one sheltered building. In the building there are four adult dogs which need to be evaluated by the attending veterinarian. Two of these are adult English Bulldogs, chip #'s 020608089 and 039620855 named Gabriel and Dixie. Both of the dogs have green matter on their left eye. The white area of Gabriel's left eye is red. In one enclosure of the building there are two French Bulldogs females, chip #'s 020778054 and 020632630, which have loose stool. All four of the animals need to be evaluated by the attending veterinarian. The dealer must maintain written documentation of the evaluation and all treatment.

Affects four adult dogs.

Correct by August 7, 2015.

2.50(y)

TIME AND METHOD OF IDENTIFICATION.

In the kennel building there is one enclosure containing two four month old puppies. The puppies do not have any form of identification. All class ``A" dealers (breeders) shall identify all live dogs on the premises at all times to insure traceability.

Affects two puppies.

Correct by August 7, 2015

3.9(b)

FEEDING.

Through-out the kennel building there are eight primary enclosures whose contained animals are not provided with food receptacles. The dealer stated the animals had been chewing the food receptacles so he removed them placing the dry food on the floor of the enclosure. Food receptacles must be provided for all dogs. They must be readily accessible to all dogs and must be located so as to minimize contamination by excreta and pests, and be protected from rain and snow. Feeding pans must either be made of a durable material that can be easily cleaned and sanitized or be disposable.

Affects twelve adults.

Corrects by August 7, 2015

Inspection Report

3.11(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The kennel building needs to be cleaned through-out the common areas of the kennel building, the food storage area and the puppy housing area. There are accumulations of dead bugs, hair, dirt, spilt food, medical containers with used syringes and open food containers for non-regulated animals. Premises where housing facilities are located, including buildings and surrounding grounds, must be kept clean and in good repair to protect the animals from injury, to facilitate husbandry practices and to reduce or eliminate breeding and living areas for rodents and other pests and vermin.

Affects twenty-eight adults and fifteen puppies. Correct by August 8, 2015

The inspection and exit briefing was conducted by the facility Representatives and Sandra Meek, ACI.
