### 2.31(c)(1)

#### Institutional Animal Care and Use Committee (IACUC).

The research facility has had significant drift in their timeline to conduct IACUC functions. The facility's IACUC meets twice a year to conduct a program review, facility inspection, and report to the IO. The facility was previously on a Feb-Aug timeline. In 2023, the IACUC conducted it's semi-annual review and facility inspection Feb 17th, then Sept 28th, at a 7 month interval. In 2024, the IACUC conducted it's semi-annual review and facility inspection March 11th, then Nov 12th, at an 8 month interval. The semi-annual review and facility inspection was next conducted April 8, 2025. It is important that program reviews and facility inspections be conducted in a timely manner at appropriate intervals so that problems can be identified and addressed before they progress and become detrimental to the health and well-being of research animals. Correct by conducting program reviews, facility inspections, and submitting reports to the Institutional official at least every 6 months or more frequently. Correct by 10/31/25

This inspection and exit interview were conducted with facility representatives.
