Type: ROUTINE INSPECTION
Date: 09-JUN-2015

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

Since the previous inspection on July 31, 2014, records of animal births and deaths were not maintained for the guinea pigs. Records must be kept on animals for animal tracking, assessment of the animal care program, and to comply with the Animal Welfare regulations. The licensee must ensure that records on animal births and deaths are kept and maintained.

Correct from this day forward.

3.31(a)(1)

SANITATION.

Primary enclosures for guinea pigs are not being cleaned adequately or often enough to remove accumulations of feces, dirty bedding and debris. All of the enclosures have accumulations of feces, dirty bedding and debris. The cleaning process (method and frequency) utilized is not effective in removing this accumulation. Licensee stated that he cleans and sanitizes enclosures every 2 weeks. A more frequent cleaning program is necessary to prevent an accumulation of feces, dirty bedding, and debris. Ineffective cleaning and sanitation exposes the animals to potential disease hazards such as bacterial, fungal, and viral diseases. Primary enclosures must be cleaned often enough to prevent an accumulation of feces, soiled bedding, and debris and must be sanitized once every 2 weeks. Correct by ensuring that all enclosures are kept clean and sanitized at least once every 2 weeks.

Correct by June 10, 2015

An exit briefing was conducted with owner's wife.
