Type: ROUTINE INSPECTION
Date: 08-JUN-2016

2.40(b)(2) DIRECT REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

An adult female Yorkshire terrier (m/c# OAO2063507 and m/c# OAO2063816) was limping on its left rear leg. The dog would hold the leg in the air most of the time when walking. The left rear paw was very painful when palpated. The licensee stated that she had accidentally stepped on the dog's foot three days earlier. This dog also repeatedly shook its head, rubbed its right ear against the side of the enclosure, and scratched its right ear. There was black material inside the ear canal and two small bloody spots on the skin inside the ear. Untreated ear and foot problems can be painful and can worsen with time. The licensee must have the dog examined and treated by a veterinarian, must follow the treatment recommendations, and must make medical records available to the inspector upon request.

The exit briefing was conducted with the licensee and Katy Vernon-ACI.

All of the dogs listed under 2.40(b)(2) from the 5/26/16 inspection report had their matted hair removed. The three dogs with eye problems had been examined and treated by a veterinarian. All of the other NCIs from that report had also been corrected.

Additional Inspectors

Vernon Kathryn, Animal Care Inspector
