PEACEABLE KINGDOM

Type: ROUTINE INSPECTION
Date: 17-JUN-2014

2.126(a)(2)

ACCESS AND INSPECTION OF RECORDS AND PROPERTY; SUBMISSION OF ITINERARIES.

Section 2.126(a)(2) Access and inspection of records: The animal records, current Program of Veterinary Care and the Primate Enrichment Plan could not be located during this inspection and were not available for review. These records are used for animal tracking and during the evaluation of the facility's programs for veterinary care and animal husbandry. Records must be available to APHIS officials to provide the necessary information during inspections.

Correct by June 24, 2014.

3.125(a) REPEAT

FACILITIES, GENERAL.

Section 3.125(a) Structural strength: During this inspection four goats, two sheep and two pigs were inside the perimeter fence around the enclosures housing the wild and exotic animals. These animals were not inside an enclosure, but were walking around the animal enclosures. There are areas with chain link fencing coming out of the ground from the sides of some of the animal enclosures and one area with partially buried chain link fencing that may be the site of a new enclosure. The animals may injure their legs on the chain link coming up out of the ground. The protruding chain link must be buried/covered up or the animals kept out of this area for the safety of the animals.

3.131 REPEAT

SANITATION.

Section 3.131(c) Housekeeping: Fencing, wood, old enclosures, tires, and miscellaneous items are stored around the outdoor animal enclosures, food storage area and perimeter fence. All this clutter provides good hiding places for mammalian pests and prevents vegetation from being cut/trimmed around the enclosure fencing. Animals may be injured when walking through these areas to move to other enclosures or into the transport trailer. Animal and food storage areas must be free of clutter and debris to deter pests and for the safety of the animals.

An exit briefing was conducted with the licensee. End of report.
