4581 Atlanta Hwy  
Rutledge, GA 30663

Customer ID: **503430**  
Certificate: **57-C-0366**  
Site: 001  
Trevor Maclean

Type: RE-LICENSE INSPECTION  
Date: 06-SEP-2024

---

### 3.127(d)

#### Facilities, outdoor.

The 6-foot perimeter fence is not adequate in some areas as listed below:

- One portion of the perimeter fence is serving as the left side (side facing the driveway into the facility) of two African crested porcupines' enclosure.
  - Two sides of a tapir's enclosure (one side facing the driveway into the facility and the other facing the front of the property) is using the perimeter fence as part of its primary enclosure.
  - One portion of the perimeter fence (along the driveway facing the front of the property) has large gaps, approximately 8-inches wide and 6 to 8 inches tall at the bottom that doesn't adequately prevent other animals from passing through it.
- The lack of an adequate perimeter fence presents a safety risk to the animals within the facility in that there isn't an adequate secondary containment system to hold animals that may escape their primary enclosures or a sufficient barrier to keep animals and unauthorized persons out. The facility must ensure that the animals, when housed outdoors, are enclosed by a perimeter fence that can function as a secondary containment, is an effective barrier, continuous, 6 feet tall, and at least 3 feet in distance from the primary enclosures or obtain a variance approved in writing by the Administrator. Corrected at time of inspection.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by NOVEMBER 5, 2024, or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
