BACK TO NATURE WILDLIFE INC

Type: ROUTINE INSPECTION  
Date: 16-MAR-2016

### 2.75(b)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

There have been only 2 acquisitions since the last inspection: a black squirrel that was acquired on 7/31/15 and a opossum that was acquired on 4/20/15. In both cases, the licensee did not fully obtain the required information as follows:

The licensee did not obtain the drivers license number of the person who gave the black squirrel, and the vehicle tag number of the person who gave the opossum to the licensee

Both the drivers license number AND vehicle tag number are required to be obtained and recorded. Both of these pieces of information shall be made readily available for review by any APHIS official.

Correct upon next acquisition.

### 3.131(d)

#### SANITATION.

Numerous flies were observed on top of the meat, and around the bowl that was placed in the left side bobcat enclosure. This area does not currently have any type of fly control.

Flies can contaminate the meat, cause discomfort during eating, bite the animal, or may even prevent access to the food (depending on what type of fly is present).

A safe fly control program shall be established and maintained to reduce the number of flies that were observed in this area to protect the meat from contamination, and to protect the animal from injury, or discomfort during eating.

Correct by March 18, 2016

The exit interview was conducted with the Animal Care Specialist

Prepared By: ROBERT BRANDES, D V M USDA, APHIS, Animal Care
