2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Although records documenting veterinary care for animals off-site were reviewed, the facility was not able to provide record of the visit to the premises by the attending veterinarian in 2015 or to date in 2016.

Lack of regularly scheduled visits by the attending veterinarian might prevent the veterinarian from observing animals and their current housing conditions to determine proper care for the health and well-being of the animals

The facility must comply with the written program of veterinary care which stated that the veterinarian will visit the facility annually.

3.125(c)

FACILITIES, GENERAL.

A large number of various chemicals were stored on a shelf above food storage containers. While these storage containers appeared to be generally well-sealed when closed, contamination of the animal food might occur.

Inadvertent contamination of the food with chemicals might affect the health of the animals.

Supplies of food and bedding shall be stored in facilities which adequately protect such supplies against contamination.
