Boarding House Farm Inc.  
457 C R 13  
Ceresco, NE 68017

Customer ID: **5102**

Certificate: **47-C-0034**

Site: TRA

Boarding House Farm Inc.

Type: ROUTINE INSPECTION

Date: 13-OCT-2015

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The white Lamancha goat in the enclosure with the bridges between different fenced areas has an active nasal discharge of a white thick consistency that is accumulating and creating a dry brownish crust on the upper lip and a slight wet cough.

The black with white stripes on the face Lamancha goat in the enclosure with the bridges between different fenced areas had an active nasal discharge of a white thick consistency that is accumulating and creating a brownish dry crust on the upper lip.

The male reddish brown Nubian goat in the enclosure with the bridges between different fenced areas has an active nasal discharge of a white thick consistency that is accumulating and creating a brown dry crust on the upper lip.

The adult female white and cream goat in the main goat enclosure had an active nasal discharge of a greenish thick consistency that has crusted on the upper lip and nostrils to a point that the restricted breaths were audible.

The licensee had a log book showing that the vet visited on 8/24/15 for respiratory problems in the goats. On 9/8/15 it showed that the vet had visited, and CoRid and tetracycline were prescribed. The licensee stated that the tetracycline is still in use. The licensee stated that the vet came to re-evaluate the animals in early October, but no records were available to document the outcome of the visit.

The goats appear not to be responding to the medications. When animals do not respond to the prescribed treatment, they should be re-evaluated to ensure the treatment is still appropriate for the ongoing medical problems.

The licensee must have the four goats re-evaluated by a licensed veterinarian to obtain an accurate diagnosis and appropriate treatment plan. The licensee must make documentation available upon request. The licensee must ensure that all animals receive adequate veterinary care at all times.

TO BE CORRECTED BY: OCTOBER 16, 2016
