### 3.127(c)

#### FACILITIES, OUTDOOR.

Heavy rain several days ago has resulted in large standing puddles of water in the enclosure housing 2 warthogs . There is very little dry area in the main exhibit. Standing water creates a breeding ground for pests such as mosquitos and flies. The animals may suffer foot problems if they must remain in muddy wet areas for long periods of time. A method must be develop to rapidly eliminate standing water to prevent pest and foot problems .

CORRECT BY : 4-22-15

The inspection and exit briefing was conducted with zoo employees.
