MAY FAMILY ENTERPRISES INC

Type: ROUTINE INSPECTION  
Date: 11-DEC-2019

### 2.40(b)(2) DIRECT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

There are three adult sheep that are in need of veterinary care. A thin Hampshire ewe with green marker covering her rump and side (Tag #1422) was observed to be toe-touching on her front left leg while she was standing and was reluctant to move. A Crossbred ewe with a yellow tag (Tag #1791) and green spot on her rump was also observed to be non-weight bearing on her front left leg and was reluctant to move. Another Hampshire ewe with yellow marker on her rump (Tag# 1774) was observed to be toe-touching on her rear left leg while standing, was reluctant to move, and remained lying during the majority of the inspection. The licensee said that he had treated six to eight of the ewes recently with an antibiotic, but did not contact a veterinarian and had no treatment records or veterinary instructions in his program of veterinary care.

Failure to use the appropriate methods to prevent, control, diagnose, and treat diseases and injuries can result in pain and distress in animals with lameness.

The licensee must maintain an adequate program of veterinary care that includes methods to prevent, control, diagnose, and treat diseases and injuries.

Correct by: December 13, 2019

### 3.127(c) DIRECT

#### FACILITIES, OUTDOOR.

The outdoor sheep enclosure has an accumulation of mud covering the majority of the lot. There are also several large puddles of standing water within the area. The sheep must walk through deep areas of mud between the outdoor lot and the barn to reach their only water source. Three severely lame sheep were also observed during the inspection.

Standing in mud and water can cause distress to the animals and adversely impact the health of their hooves. The licensee should ensure that adequate drainage is provided to keep mud and water from accumulating in the animal areas.

Correct by: December 14, 2019.

The animal and facility inspection was conducted with a facility representative.
