Certificate: **41-B-0281**

Site: 001

Central Minnesota Livestock
Sourcing

Type: RE-LICENSE INSPECTION

Date: 19-SEP-2024

3.138(a)

Primary conveyances (motor vehicle, rail, air and marine).

Two trailers used to transport sheep are not being maintained to protect the health and ensure the safety and comfort of the animals during transport. The larger trailer has a ragged hole with sharp edges in the metal plate above the left rear tire well. The hole is easily accessible by the animals, located approximately 1-2 inches above the floor and approximately 2 inches in length. The smaller trailer has a gap in the metal wall paneling opposite the trailer door. The welding is no longer holding the panel in place, creating a gap approximately 1.5 feet off the floor and 1-2 inches in length.

Holes in the side of a transport enclosure that are easily accessible by the animal can lead to injury from rough, sharp edges, or potential entrapment of a body part.

The animal cargo space of primary conveyances used in transporting live animals shall be designed and constructed to protect the health and ensure the safety and comfort of the live animals contained therein at all times to prevent needless suffering and/or death.

This is a 1st Re-License Inspection for a Class B license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by November 18, 2024 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
