RESCUE INC

Type: ROUTINE INSPECTION

Date: 25-MAY-2021

3.84(c)

Cleaning, sanitization, housekeeping, and pest control.

The grounds surrounding the singly housed African green monkey, the three brown capuchins, and the agile gibbon enclosure had areas of tall weeds. The weeds were approximately two feet in height and surrounded a majority of the enclosures. Uncontrolled weeds can make it difficult to facilitate cleaning of the premises and allow for harborage of pests. The weeds must be cut in order to maintain proper husbandry practices and pest control.
