Type: ROUTINE INSPECTION  
Date: 24-FEB-2014

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\*\*\*"Baxter", white male maltese (ID # 049-295-023) had an excessive buildup of a dark brown material on the cheek teeth extending up to the gum line. Most of the cheek teeth could not be visualized. The gums were swollen and reddened and a malodorous smell was coming from his mouth that is evident when standing about 2 feet from the dog. There was a white creamy material along the gum line near one of the large cheek teeth on the right side. The buildup of abnormal material on teeth with a discharge at the gum line can be painful, impact the ability of the dog to eat normally, and harm the health of the animal. The licensee must have this animal examined by a veterinarian to obtain an accurate diagnosis and appropriate treatment plan. The outcome of this consultation must be documented and provided to the inspector upon request. The licensee must ensure that all animals receive adequate veterinary care at all times.

To be corrected by February 27,2014

The inspection and exit interview was done with a facility representative.
