Certificate: **93-C-0040**

Site: 001

Zoological Society of San Diego

Type: ROUTINE INSPECTION

Date: 07-AUG-2023

3.75(a)

Housing facilities, general.

In the silver leaf langur indoor housing in PRP, 2 vertical supports had a rusty hole that was no longer in good repair, despite a prior fix on one section adjacent to the door. Housing facilities for nonhuman primates must be structurally sound and kept in good repair.

Corrected during inspection.

3.125(a)

Critical

Facilities, general.

In fall 2022, following an unusual typhoon rain event a week or so earlier, and in conjunction with local mild earthquakes, the facility could not account for all their prairie dogs in the new Base Camp habitat on 19 September. The animals moved into the habitat over 6 months earlier and were present for morning and afternoon checks on 18 September. The prairie dog coterie typically spent much of their time in the tunnels and burrows they had constructed in the outdoor habitat, consistent with their natural behavior. On 20 September, the facility explored the tunnel system, recovering one shy animal who did not respond to recall and discovered a collapse in a poorly constructed tunnel and 5 prairie dogs had perished. The facility immediately held all the animals off the outdoor habitat as they checked the irrigation systems and redesigned the habitat, decreasing the depth of the substrate and improving the drainage, in addition to making management changes to prevent future tunnel collapse injuring animals. The Animal Welfare Act and Regulations require that outdoor housing facilities shall protect the animals from injury.

While this additional noncompliant item is also under the same regulation, it is not a critical. Prior to inspection, on 29 January 2023, a 2 year old Red Panda was not contained by her habitat. She was relatively new to the habitat and managed to climb past a tree guard and into an adjacent tree outside the habitat. Wildlife Care Specialists were successful in voluntarily recalling her back into her primary enclosure and bedroom in apparent good health. The facility ensured that the tree was trimmed and a larger tree guard was installed prior to returning her to the outdoor habitat to prevent further explorations. The Animal Welfare Act and Regulations require that the outdoor housing facilities shall contain the animals.

Corrected at the time of inspection.
