Type: ROUTINE INSPECTION  
Date: 18-FEB-2016

### 3.127(c)

#### FACILITIES, OUTDOOR.

The primary enclosures of the spotted hyenas had standing water, mud or wet surfaces from the recent rain that covered the majority of the floor surface. Dry surface space was limited to the resting platform and the nest box. A suitable method of drainage shall be provided to rapidly eliminate excess water.

Correct by; 02/22/16

### 3.131 REPEAT

#### SANITATION.

-The linoleum or vinyl tile floor covering in the kitchen had portions of the surface missing and had exposed wooden subflooring impeding good sanitization of this area. The premises (buildings and grounds) of exhibitors shall be kept clean and in good repair in order to facilitate the prescribed husbandry practices.

Original correction date of 07/31/15

-The enrichment refrigerator near the kitchen had a buildup of grime and food debris coating the shelves on the inside of the door. Additionally, surface water from rain had pooled by the exterior steps leading into the kitchen and would hinder the normal ingress and egress to the kitchen.

Correct by 02/22/16

Exit interview conducted with Facility Personnel.
