

## Inspection Report

Oklahoma City Zoo  
2101 N E 50th  
Oklahoma City, OK 73111

Customer ID: **3953**  
Certificate: **73-C-0002**  
Site: 001  
OKLAHOMA CITY ZOO

Type: ROUTINE INSPECTION  
Date: 22-JUL-2015

### 3.75(c)(1)

#### HOUSING FACILITIES, GENERAL.

- There are several areas in the great ape escape portion of the park that need attention. In all of the day rooms and in the indoor portion of the enclosures there is paint peeling from the walls. 3 of the 4 day rooms and 5 of the 9 interior primate enclosures have peeling paint areas on the concrete walls. In these areas, the coating is not in contact with the concrete walls. These areas can not be readily cleaned and sanitized and could trap debris and disease causing organisms which could affect the health of the non human primates. All surfaces must be constructed in a manner that allows them to be readily cleaned and sanitized.

Correct by: 9/22/15.

### 3.107(c)

#### SANITATION.

- The surface of the off display holding area pools for the pinnipeds has paint that is chipped, peeling and discolored. This is resulting in multiple areas where the coating is not in contact with the floor of the pools. These areas could trap pathogens and lead to disease transmission. Indoor and outdoor housing facilities for marine mammals must be structurally sound and must be maintained in good repair to protect the animals from injury. Peeling and chipped paint can not be cleaned and sanitized and may harbor harmful bacteria. The pool surfaces should be repaired or replaced to ensure the safety of the animals in the enclosures.

Correct by: 8/14/15.

### 3.125(a)

#### FACILITIES, GENERAL.

-The bottom and side corner chain link fencing wire on the enclosure gate to the outdoor Grevy zebra's holding area is curled up and has sharp points sticking out. The wires are sticking into the enclosed area and could result in an injury to the enclosed animal. The wires should be repaired or replaced to prevent injury to the enclosed animal.

Correct by: 07/23/15

Prepared By: DEBBIE CUNNINGHAM, D V M USDA, APHIS, Animal Care

## Inspection Report

---

### 3.131(d)

#### **SANITATION.**

- At the time of the inspection there were rodent droppings accumulating on the floor concentrated around the edges and corners in the elephant food preparation area. Lack of an effective program that controls rodents can create unsanitary conditions that lead to the potential spread of disease. Traps were present however, most were not set or baited. An effective program of rodent control must be established and ensure all rodent droppings are removed from the area for the health and well being of the elephants.

Correct by: 7/23/15.

Inspection and exit interview conducted with Brittany Light, ACI, Debbie Cunningham, VMO and facility representatives.

#### **Additional Inspectors**

Light Brittany, Animal Care Inspector
