Oklahoma City, OK 73108

Customer ID: 3955
Certificate: 73-B-1814
Site: 001
QUALITY PETS, INC.

Type: ROUTINE INSPECTION
Date: 27-MAY-2014

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

- The following medications stored in current drug storage area were past the expiration date:

Albon Oral 5% solution expired 02-2012

Griseofluvin suspension 10 mg/ml expired 2/28/12

These medications were intermingled with other pharmaceuticals that are currently being used in the facility and are therefore ready for use.

Use of expired medications is not be an appropriate method to prevent, control, and treat diseases and injuries since the expected results cannot be guaranteed and the animals may experience pain and distress due to mistreatment, unrelieved symptoms, or due to unexpected side effects.

The licensee must ensure that all medications used in the facility are not expired and labeled properly in accordance with standard veterinary practices and manufacturer's recommendations.

Corrected during the inspection.

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

- There were at least four animals with injuries that were not being treated at the time of inspection. A sunfire female hamster in bin #7928 had a significant bite wound on her nose. A sunfire male hamster in bin # 7934 had crusty material around his eyes. There were two dwarf hamsters in bin # 7948 that had dime sized lesions on their dorsum by the base of the tails. These lesions appeared to be significant bite marks from other hamsters in the same bin. There was no documentation present that addressed these injuries or indicated that the attending veterinarian had been contacted. All animals must be observed daily and any veterinary care issues must be timely and accurately relayed to the attending veterinarian. The facility must insure that a program is place to insure that all injured animals receive prompt and adequate veterinary care.

To be corrected immediately.
