Dundee, NY 14837

Customer ID: **21623**
Certificate: **21-A-0077**
Site: 001
SAMUEL ZIMMERMAN

Type: ROUTINE INSPECTION
Date: 18-MAR-2020

3.1(a)

HOUSING FACILITIES, GENERAL.

*** Several of the outdoor wire mesh enclosures need to be addressed. Some of the wire between runs is no longer securely attached to the base and is creating gaps between enclosures. This could allow an appendage to get through and cause potential injury. Several of the metal doors have flaking paint and are rusted, potentially affecting the structural integrity of the door. Lastly there is a section of the wood beam underneath the mesh floor at the end of the run that is rotted out with sections of wood missing. These outdoor sections of the primary enclosure must be maintained in good repair for the safety of the dogs.

Correct by: June 20, 2020

3.1(c)(1)

HOUSING FACILITIES, GENERAL.

*** Several feeders in the kennel are rusted along the lip of the feeder. Once rust develops the feeders can no longer be effectively cleaned and sanitized. These feeders need to be replaced to facilitate cleaning of the feeders for the health of the dogs.

*** Several areas of wood inside the shelter boxes are chewed at the top and the area is no longer impervious to moisture. These areas of wood need to be sanded and resealed to keep the area impervious to moisture to facilitate cleaning and sanitizing.

Correct by: May 20, 2020

3.1(e)

HOUSING FACILITIES, GENERAL.

*** The bags of dog food stored on a pallet just outside the kennel area were open and food was on the ground around the area. There was also non food items stored on top of the bags that should be removed. Food must be stored in a manner that prevents contamination and deterioration of its nutritive value. Food storage must be addressed for the health of the dogs.
