SHARON CARUTH

Type: ROUTINE INSPECTION
Date: 19-FEB-2014

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

One male Yorkshire Terrier (ID # 431; DOB 4/9/01) has a constant and severe head tilt to the left. When the inspector first approached the enclosure the dog remained curled up on a blanket and was slow to lift its head. The right eye is severely cloudy and there is a trail of drainage and brown crusts coming from the inside corner of the eye and mixed in with the hair on the eyelids and face.

These medical conditions can be painful, uncomfortable for the animal or lead to other medical complications. This animal must be examined by a licensed veterinarian in order to ensure that an accurate diagnosis is obtained and an appropriate treatment plan is developed and followed. This information must be documented and made available to the inspector upon request.

This dog must be evaluated by a licensed veterinarian by 5 pm on Friday, February 21, 2014.

Inspection and exit briefing conducted with the owner.
