Type: ROUTINE INSPECTION
Date: 12-JUL-2021

2.75(b)(1)

Records: Dealers and exhibitors.

The facility did not have complete disposition records. Acquisition records showed 30 mongoose were received by the licensee, but disposition records were not available for 17 of these animals.

Acquisition and disposition records, including offspring born at the facility, are necessary to accurately track animals being used in regulated activities. The licensee shall make, keep, and maintain records of acquisition/disposition of all animals that fully and correctly disclose the required information.

Correct by July 29, 2021.

3.125(a) Critical

Facilities, general.

On May 18, 2021 a honey badger escaped from its primary enclosure. The enclosure originally housed four honey badgers, in which one slid through the siding of its enclosure and exited the facility through a window in the room. Although the licensee stated all doors and windows were closed and secured, the honey badger still managed to maneuver its way through the window. US Fish & Wildlife were notified, hiring a third party trapper to capture the badger. Upon arrival to the trap, the honey badger was deceased.

Inspection Report

Animals escaping from primary enclosures are more vulnerable to harm and further injury when they are not safely contained. They also pose a threat to other people and animals if they are not effectively held in their designated enclosures.

Housing facilities shall be structurally sound and maintained in good repair to contain the animals and protect them from injury. The facility must be constructed of such material and of such strength as appropriate for the animals involved.

Correct by July 29, 2021.

This inspection and exit interview were conducted with the licensee.
