3.125(a) REPEAT

FACILITIES, GENERAL.

There is hay string and sections of an old tarp on the ground in the pens housing goats and alpacas. A board is on the ground in another animal pen and sections of boards are leaning against the alpaca shelter. The hay string and tarp may injure the animals if ingested or if they tangle around an animals legs. The loose boards may injure or trap an animal.

Hay string and other items left in animal enclosures were a problem noted on the last inspection dated 2-13-13. Enclosures must be kept free of debris that may cause injury to the animals.

The inspection and exit briefing was conducted with the farm manager. An exit briefing was conducted with the owner by phone.
